Restore pages? Chrome didn't shut down correctly.
Restore

The screenshot shows a web-based IDE interface for OnlineGDB. On the left, there's a sidebar with links for Classroom (new), Learn Programming, Programming Questions, Sign Up, and Login. The main area has tabs for Run, Debug, Stop, Share, Save, and Beautify. A file named 'main.py' is open, containing a simple for-loop that prints a list of random numbers. The output window shows the execution of the script, producing two lists of numbers and then exiting. A 'Restore pages?' dialog is visible in the top right, indicating that Chrome didn't shut down correctly. The bottom status bar shows the date and time (23:55 03-01-2025) and language settings (ENG IN).
